

KEEP IT SIMPLE SHORT

Maintenance of Wood Floors

I. Strato sealed

1. Clean with a broom
2. Wipe with a damp cloth with **euku-clean** in the wiping water (concentrated neutral cleaner), removes wax film step by step.
3. Apply **euku-wax** or **euku-mattwax** undiluted with the floor mop or a cloth, self-glossing resp. self-hardening (euku-mattwax)

II. Pre-finished Parquet

Build up a humidity barrier at the edges with **euku-polish plus**, solvent based. Afterwards pad it which is recommended to be done by a craftsman.

Then follow the maintenance, see I.

(Please follow the recommendations of the manufacturers of pre-finished parquet in case of nano or anti-scratch sealings)

III. Oiled Floors

1. Clean with a broom
2. Remove heavy dirt with a green pad.
3. Maintenance and care with **euku-pflege-emulsion** in the wiping water. Refresh the floor from time to time with **euku-refresher** or **euku-pflegeöl** and pad it resp. polish it with a cloth.

Please do not forget to offer your customers, using the Strato 372 matt, Strato 342 matt and Strato 462 matt/Strato 463 ultra matt the euku-mattwax, preferably with the floor mop for easier application.
